

## RECOGNISED QUALIFICATIONS MAP

[Last updated - 01.07.08]

This document sets out the qualifications recognised by the Professional Certification Advisory Panel (PCAP) as providing “direct” or “complementary” evidence against each of the units in FDAP’s Drug & Alcohol Professional Certification scheme.

---

### Compulsory units

#### DANOS units:

- Assess and act upon immediate risk of danger to substance users [AB5]
- (Either) Carry out assessment to identify and prioritise needs [AF2] (or) Carry out comprehensive substance misuse assessment [AF3]

#### Generic “core” units (from the “Health & Social Care” (HSC) national occupational standards):

[NB these are the “core units” for a Level 3 NVQ in Health & Social Care.]

- Promote effective communication for and about individuals [HSC31]
- Promote, monitor & maintain health, safety & security in the working environment [HSC32]
- Reflect on and develop your practice [HSC33]
- Promote choice, well-being and the protection of all individuals [HSC35]

#### Other generic units (from the “Health & Social Care” and “General Health” NOS):

- Make use of supervision [GEN36]
- Relate to, and interact with, individuals [HSC233]
- Promote equality, diversity, rights & responsibilities of individuals [HSC3111]

#### **Specialist options** (from DANOS):

- Support individuals who are substance users [AB2]
- Provide services to those affected by someone else's substance use [AB7]
- Raise awareness about substances, their use and effects [AD1]
- Develop & disseminate information & advice about substance use, health & social well-being [AD4]
- Test for substance use [AE1]
- Develop, implement and review care plans for individuals [AG1]
- Prescribe controlled drugs for substance users [AH1]
- Supply and exchange injecting equipment for individuals [AH3]
- Support individuals through detoxification programmes [AH7]
- Supervise methadone consumption [AH9]
- Employ techniques to help individuals adopt sensible drinking behaviour [AH10]
- Counsel individuals about their substance use using recognised theoretical models [AI1]
- Counsel groups of individuals about their substance use using recognised theoretical models [AI3]

## Qualification categories

Two types of qualification-based evidence are recognised by the Professional Certification Advisory Panel (PCAP).

### Direct evidence

UK-accredited awards<sup>1</sup> based on an up-to-date (within three years) direct assessment of competence against a particular NOS unit (or its exact equivalent), and verified by an independent, qualified NVQ assessor – including NVQ-related awards<sup>2</sup> and OU/FDAP awards<sup>3</sup>.

### Complementary evidence

Qualifications recognised by the PCAP as incorporating an assessment of workplace competence which provides supportive evidence of competence in a given unit. These fall in to three categories:

- “Professional qualifications” - which are restricted to professional certifications issued by UK-recognised professional bodies;
- “Vocational qualifications” - which are restricted to UK-accredited awards<sup>1</sup> based on a direct assessment of competence against one or more NOS units, and verified by an independent, qualified NVQ assessor;
- “Other qualifications” - which are restricted to UK-accredited awards<sup>1</sup> focusing on substance misuse - the PCAP is unable to consider awards which are not UK-accredited or cover other subject areas.

Only qualifications formally “recognised” by our independent Professional Certification Advisory Panel (PCAP) can be accepted as “direct” or “complementary” evidence against a given unit. However, the list of qualifications recognised by the PCAP is kept under constant review - and awarding bodies and members of FDAP may submit additional qualifications for consideration by the Panel.

For some units, any UK-accredited substance-misuse related qualification at Level 3 or above is accepted as complementary evidence under the heading “other qualifications” for certain groups of professionally qualified practitioners<sup>4</sup>, provided they *“focus on working with substance users”*.

---

<sup>1</sup> “UK-accredited award” = a qualification appearing on the National Database of Accredited Qualifications or awarded by a body accredited by the Qualification & Curriculum Authority or awarded by a UK Royal College.

<sup>2</sup> “NVQ-related award” = national qualification, on the National Database of Accredited Qualifications, based on an independent assessment of competence against National Occupational Standards (NOS) - includes NVQs, “individual (NVQ)-unit accreditation” and the Award/Certificate in Working with Substance Misuse.

<sup>3</sup> “OU/FDAP award” = award, from the Open University and FDAP, based on an independent assessment of competence against units from DANOS and other NOS suites, verified by a qualified NVQ assessor – includes 10-unit Professional Award for Drug & Alcohol Practitioners and smaller Professional Development Awards.

<sup>4</sup> “Professionally qualified practitioners” = those qualified to practice in regulated health & social care professions (doctors, nurses, psychiatrists, psychologists, pharmacists, social workers, probation officers etc), UK-qualified teachers and UK-accredited counsellors and psychotherapists.

### **Qualifications providing evidence against ALL relevant compulsory units and 1+ options**
