Notes

You should 'sign off' the applicant's competence in relation to each of the items listed below only where you have *clear evidence* that they have demonstrated the appropriate knowledge or skills in *real life* settings. Your assessment should be based on one or more of the following: observation of the applicant's practice, your supervision of the applicant, evidence provided by an appropriate third party (such as clients / colleagues / previous supervisor/line manager). Note - completion of a training course does NOT itself provide evidence of competence in a particular area.

In some cases the applicant will not have the opportunity within their existing position to demonstrate all of the required competences. Where this is the case, arrangements will need to be made for their competence to be assessed in an alternative setting (such as on placement), or, where applicable, for it to be confirmed by a supervisor / line manager from a previous post.
